Bionic
Reading®

Marco from UK writes us:

“I am a dyslexic lawyer and I struggle a lot with long walls of text when reading documents.

I am already using lots of alternative strategies to improve my reading, but when I started using Bionic Reading® in some long contract reviews, I felt much more empowered.

My attention levels have improved relevantly, I was able to keep my focus longer, and I also reduced my bias and misunderstandings when reading.

**Bionic
Reading®**

I feel very supported. I strongly recommend Bionic Reading®. I am excited to see what this project can reach in the future!”

More than 15% of the population has great difficulty reading and understanding texts. And they write us. Every day.
