Bionic Reading®
is life-changing!

bionic-reading.com

Tiffani from USA writes us:

“I’m ADHD and autistic. I’ve always been a slow reader, but I enjoyed reading, nonetheless. However, since experiencing large amounts of burnout and trauma, I find reading to be torturous.

I can barely make it through 10 pages of reading before needing a nap from of how draining it is. I constantly have to re-read paragraphs to retain information

**Bionic
Reading®**

**because it doesn't stick or I get distracted.
And it takes me so long that I feel shame
and guilt doing something that comes
easily to others.**

**Reading with Bionic Reading®, I don't find
myself going back over passages because
I have improved comprehension, and
I read 3× as fast. I wish it was accessible
everywhere.**

Bionic Reading® is life-changing!"
